

Supplier name: Eurosets UK Limited

Publication date: 06/02/2026

## 1 COMMITMENT TO ACHIEVING NET ZERO

Eurosets is committed to minimising the environmental impact of our activities and achieving Net Zero emissions by 2045.

We are committed to reducing greenhouse gas emissions through the efficient use of energy and resources, the adoption of energy-efficient technologies and responsible operational practices.

## 2 BASELINE EMISSIONS FOOTPRINT

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions.

Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2025 (1 January 2025 – 31 December 2025)		
Additional Details relating to the Baseline Emissions calculations.		
The baseline defined relates to the Eurosets UK Limited and covers our operations in the UK. 2025 was our first year of reported emissions and is our baseline year.		
Baseline year emissions:		
EMISSIONS		TOTAL (tCO <sub>2</sub> e)
Scope 1		0.00
Scope 2		0.00
Scope 3 (Included Sources)	4: Upstream transportation and distribution	264.43
	5: Waste generated in operations	0.00
	6: Business Travel	15.14
	7: Employee Commuting and Homeworking	0.23
	9: Downstream transportation and distribution	113.54
<b>Total Emissions</b>		<b>393.34</b>

### 3 CURRENT EMISSIONS REPORTING

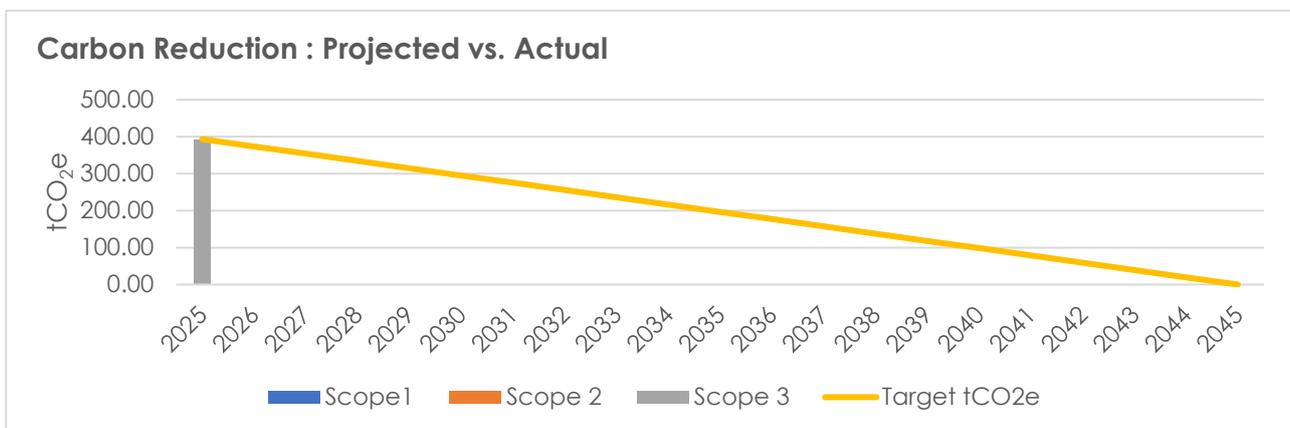

Current Reporting Year: 2025 (1 January 2025 – 31 December 2025)		
Reporting year emissions:		
EMISSIONS		TOTAL (tCO <sub>2</sub> e)
Scope 1		0.00
Scope 2		0.00
Scope 3 (Included Sources)	4: Upstream transportation and distribution	264.43
	5: Waste generated in operations	0.00
	6: Business Travel	15.14
	7: Employee Commuting and Homeworking	0.23
	9: Downstream transportation and distribution	113.54
<b>Total Emissions</b>		<b>393.34</b>

Our Scope 3 emissions make up 100% of our carbon footprint, with our company operating as a fully homeworking organisation in the UK. Within our Scope 3 we include emissions from homeworker's electricity and heating and all business travel: road, flights, trains and sea.

### 4 EMISSIONS REDUCTION TARGETS

In order to continue our progress to achieving Net Zero by 2045, we have adopted the following carbon reduction targets. We project that carbon emissions will decrease over the next five years to 295.01 tCO<sub>2</sub>e\* by 2030. This is a reduction of 25%.

Progress against these targets will be seen in the graph below:

\*tCO<sub>2</sub>e – tonnes of carbon dioxide equivalent emissions

## 5 CARBON REDUCTION PROJECTS

Eurosets is committed to minimising the environmental impact of our activities and achieving Net Zero emissions by 2045.

### Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed in the last 12 months, and the measures will be in effect when performing the contract.

- **Scope 3 Emissions Monitoring** - Measurement and monitoring of Scope 3 greenhouse gas emissions to better understand supply chain impacts and to inform targeted actions to reduce emissions associated with suppliers including transportation and distribution.
- **Energy and Resource Efficiency** - Adoption of responsible operational practices that promote the efficient use of energy and resources, to reduce consumption and associated greenhouse gas emissions.

### Planned Carbon Reduction Initiatives

In the future we hope to implement further measures such as:

- **Supply Chain Engagement** - Working with key suppliers to better understand and monitor their environmental practices, including reviewing transportation and distribution arrangements to identify opportunities for cleaner and energy-efficient fuels where practicable and within our influence.
- **Travel and Remote Working** - Adopting a remote-first approach to meetings to minimise business travel and associated emissions, supported by effective digital collaboration tools.
- **Energy-Efficient Home Working** - Encouraging efficient home-working practices, including responsible energy use, 'switch-off' behaviours for lighting and electrical equipment, and the use of energy only when required.
- **Training and Awareness** - Providing training and awareness-raising activities for employees to support environmental management, including climate and environmental awareness training to embed sustainable behaviours.

## 6 DECLARATION AND SIGN OFF

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>1</sup> and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>2</sup>.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard<sup>3</sup>.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

*Kendra Dobson*
